Subject: \$1 billion worth of software.....not what you think

As a professional business person I recognize the proposed \$1 billion settlement as nothing serious to Microsoft, and instead, a coup of a PR and marketing assault on young minds.

Imagine all those poor kids having to use monopolistic software given as a "gift" or "punishment", whatever, now they get hooked on it, Microsoft is squealing in delight as it seriously tries to not giggle in your settlement meetings.

Wake up.
